

# Hope AI

## SCENARIO BASED LEARNING

A) By using (ML) and getting the employees salary(data) and also getting other inputs like experience , performance/Skills of the employee as an input, using the supervised learning(categorical data), to predict if the person has a chance of leaving or not under all these circumstances.

B) Step 1.Machine Learning

Step 2.Supervised-learning

Step 3. Classification(Categorical data)

C) Name = Job resignation prediction

D)

Salary	Experience(y ears)	Performance	output(yes/n o)
--------	-----------------------	-------------	--------------------

\$20,000	5	40%	no
----------	---	-----	----

\$30,000	7	60%	yes
----------	---	-----	-----
